MHM Experts Contribute to SAS 70 Guide

At MHM, high quality work and technical expertise are part of our core values. Recently, those values were recognized and utilized by Thomson Reuters/PPC (PPC) in its newly published SAS 70 guide titled e-Practice Aids for Reporting on Controls of Service Organizations. The unique engagement requirements and reporting issues SAS 70 presents for service organizations created a need for this guide. PPC solicited help from **Dan Klapheke** (Atlanta), **Dean Flores** (Atlanta), **Derek Bridges** (Kansas City) and **Marc Davis** (Irvine) to contribute to the content and review of the guide because of their extensive experience and understanding of SAS 70. By sharing their knowledge, this group has been acknowledged for their excellence in their industry niche, as well as being recognized as co-authors of the publication.

The PPC SAS 70 guide includes a complete set of practice aids that will guide you through both Type 1 and Type 2 engagements, extensive guidance and practical considerations to address SAS 70 requirements and numerous examples with illustrative reports and procedures for various types of service organizations. To view a complete description of the guide, [click here](#).
